

## PRECIPITATION SENSOR "rain[e]"

## Weighing precipitation sensor

The first of a new kind.

Latest weighing technology combined with a self-emptying precision tipping bucket allows the rain[e] a high resolution and high precision at a very small construction volume. Already the first drop will be measured! The rain[e] is ideal to setup new measurement network as well as addition to an existing rainfall measurement network.

- amazing resolution and accuracy
- checking of sensors with tipping bucket and other weighing systems
- compact and robust construction with a very low weight
- all-metal housing, weatherproof and durable
- best connectivity by several interfaces
- installation and maintenance are very

classical meteorology and hydrology · measuring networks of water suppliers • lysimeter systems • sewage plants • Weather services • airports • traffic meteorology
